

Lafarge – Archives, Year 2010

February 12, 2010 - Update on the expansion - the schedule is as it states in the Approval - start by May 31, 2011 or completed by May 31, 2014. Lafarge should have more clarity on the exact expansion timeliness by this summer.

September 15, 2010 - Update from Lafarge - The expansion is still planned as outlined in the approval although it has not been "officially" given the final go ahead internally from France.

As far as the Energy Resources Conservation Board (ERCB) Industrial Development Permit (IIDP) approval we are working on some Supplemental Information Requests (SIR's) from the ERCB and hopefully this will pave the way for us receiving the Industrial Development Permit. (IDP)
